

Post-Appointment Questionnaire Results

As part of our initiatives to measure satisfaction of persons served (our examinees), following each assessment we provide our examinees with a satisfaction survey, which they are encouraged to complete. Filling out the questionnaire is voluntary, as is providing identifying information and comments.

Four times a year we report this information to our employees, assessors, and clients, and post the results in our clinic for review.

Here is the data set for examinee satisfaction surveys for the period July through September 2024.

For the questions 1 is strongly disagree and 10 is strongly agree. Our internal target is to maintain all categories at 9.00 or greater.

Q3 2024 – SOMA Post Appointment Questionnaire Results
